

VERDANT OASIS™

Phyto-Rich™ Hemp Stalk Oil

VERDANT OASIS grows and processes industrial hemp in Europe and is positioned to meet the sharply rising demand for high quality hemp through vertically integrated operations from seed to finished products. Verdant Oasis owns intellectual property for the development of exclusive hemp products from seed bank-certified, genotyped strains; exploiting unique hybridized cannabis cultivars in “Eco-Certified” growing operations spanning nine European companies; and utilizing proprietary CO₂ extraction and refining technology.

COMMITMENT TO QUALITY

- Multi Spectrum Profile
- European Eco-Farming practices
- Clean CO₂ Extraction
- Independently tested for purity & quality
- European Non-GMO Hemp
- Kosher
- Tested For Pesticides and Herbicides
- No ETO or Gamma Irradiation
- No Organic Solvents
- Allergen Free (FALCPA)
- ISO 9001 compliant, HACCP certified
- Available in powder and oil forms

HEMP- NATURE'S SUPER FOOD

Hemp is considered a nutritious food, and a vegan source of essential fatty acids, protein, fiber and naturally occurring phytocannabinoids. Phytocannabinoids have gained national media attention for their numerous benefits. Phytocannabinoids are consumed from many foods including carrots, chocolate, hops, pepper and other spices. The richest and most important food source is hemp.

“Our finished product is a presentation of hemp’s healthy attributes, independently tested for purity and quality.”

BALANCE • SUSTAIN

THE ENDOCANNABINOID SYSTEM AND YOUR HEALTH

One of the most important medical advances in our lifetime is the discovery of the Endocannabinoid System (ECS) - an intricate network of receptors and signaling molecules (Endocannabinoids) found throughout the entire body. The ECS helps maintain health and well-being (homeostasis) and may be viewed as a master adaptogenic network involving neurological, cardiovascular, skin, respiratory, immune, gastrointestinal, musculoskeletal systems and influencing many important cellular functions and metabolic processes.
